

Tests and results

Information for patients

Your doctor or nurse may have requested tests such as bloods, urine, x ray or scan. Usually the clinician will have given clear instruction about obtaining then results or of any follow up that may be required.

Please do not assume that because we haven't contacted you that your results are normal. We strongly advise you to check this as rarely samples can get lost in transit to the laboratory. You can obtain your results by looking at your records online or by telephoning reception after 10.30 am.

Results can take up to 1 week to be returned to us so please wait for 1 week before telephoning reception unless your doctor/nurse has advised you to do otherwise.

The practice has a strict policy regarding confidentiality and data protection and so we will not release test results to the person to whom they relate to anyone else unless that person gives permission at that time.
